Featured Solutions

SAP Business One

“SAP Business One has helped us address our key pain areas like materials resource planning management and exercise processes. **We now have strongly integrated business processes and get instant insights into critical information.**”

Sukanto Chaudhary, CEO,
Haryana Leather Chemicals

BEFORE: NO SYNC IN INTEGRATION, PRODUCTION AND PROCUREMENT PROCESSES

- ✓ With business footprints over 25 worldwide locations, Haryana Leather Chemicals needed a global ERP software to gain real time insights into purchase and material costing
- ✓ Inefficient legacy software was incapable of planning and forecasting stock movements that affected production processes and order deliveries
- ✓ Lack of quality control created trust issues among customers
- ✓ Lack of accurate reporting hindered business planning and audit review processes

WHY SAP & UNEECOPS

- ✓ SAP Business One is an internationally accepted, user friendly software with advanced features like materials resource planning (MRP) that perfectly suited Haryana Leather's requirements
- ✓ This fully integrated, end-to-end ERP software provides unique manufacturing functionality while meeting compliance and complex quality control regulations
- ✓ SAP Business One includes management of last purchase, price/material costing for stock and has an easy MRP+ Cost Management system
- ✓ Uneecops customized the solution for Haryana Chemicals to meet industry-specific challenges

AFTER: COMPLETE INTEGRATION AND REAL-TIME INFORMATION ACCELERATED GROWTH

- ✓ SAP Business One integrates the entire financials, cost management, inventory tracking, production, and procurement processes with noticeably accelerated business growth
- ✓ Simplified MRP and cost management system
- ✓ Quick and easy WIP inventory tracking
- ✓ The software manages the entire quality process from goods-in through to customer delivery with assured compliance to regulations

EFFICIENCY GAINS

Assured Compliance

Built-in licensing restrictions of the software ensured quality standards and regulatory compliance

WIP Inventory Tracking

Integrated departments and branch locations rendered a 360-degree view of real-time inventory

Think Intelligent Enterprise Think Uneecops
