

# Uneecops Plus+

## Pharma

### Why Uneecops PLUS+ ?

In an industry that is extremely dynamic, yet follows stringent compliance practices, it becomes essential to have a system that throws accurate, actionable information, in time. Uneecops PLUS+ for pharmaceuticals is designed to capitalize on ERP capability of SAP Business One.

It enables the consolidation and integration of pharmaceutical manufacturing processes across multiple units and helps pharmaceutical businesses to keep a track on sensitive operations across organization, such as compliance, expiry management, quality, formulation, costing, yield, etc.

### Key Benefits

- Compliance Management
- Real time bi-directional material traceability
- Batch tracking in WIP with yield reconciliation
- Effective management of BMR/BPR as per GMP
- Wastage elimination through Expiry alerts & FEFO based material consumption
- Quality Management – IPQC, In process inspection and Certificate of Analysis
- Management Information Reporting at various levels
- Manage outsourced lab testing for microbiology tests
- Minimize the operational work through automatic alerts between departments

Ready to optimize business costs and maximize profits?

**Try Uneecops PLUS+ today!**

# Key Functionalities
