Uneecops Plus+

Quality Management

Why Uneecops PLUS+ ?

Uneecops PLUS+ for Quality add-on implements a standard and integrated solution to map quality processes in manufacturing industries. This extensive add on to SAP Business One facilitates organizations to track their Quality Checks on the basis of business specific parameters and actionable information. Placing great emphasis on quality assurance, PLUS+ Quality addresses multiple issues pertaining to quality checks, quantitative & qualitative parameters for individual items, and multilevel multi-version quality tests.

PLUS+ Quality helps businesses outline quality warehouse for different stages/process, perform Quality Test at any Inward, Outward, In-Process etc, and efficiently manage Actual OK, Rejected, Re-workable quantity.

Key Benefits

- Reduce production loss
- Better waste management
- Real time quality analysis
- Cost reduction by auto debiting vendors for quality gaps
- Managing quantitative and qualitative parameters for accurate quality
- Managing quality for job work / sub contracted items and processes

Ready to optimize business costs and maximize profits?
