Electronic System Design & Manufacturing Services

“We have been associated with Uneecops for the past 8+ years and they have been maintaining our software standards very well. **With Uneecops as a reliable SAP Business One partner, you can breathe a sigh of relief.**”

J.S.Gujral, Managing Director,
SGS Teknics Manufacturing Pvt. Ltd.

BEFORE: DISCONNECTED MANUAL SYSTEMS LED TO DELAYED DELIVERY

- ✓ Unsynchronized systems running at multiple manufacturing units and design & development centers in Germany and India posed challenges related to data security and accuracy
- ✓ There was a need for a regulatory compliant ERP to cope with the changing consumers' expectations and demands
- ✓ Supply chain management was one of the key challenges that impacted the production process
- ✓ In-house systems did not allow access to real-time inventory or sales data which led to issues in meeting production requirements on time

WHY SAP & UNEECOPS

- ✓ SAP Business One offered an enterprise-level solution for all manufacturers to manage multi level bills of materials, conduct materials planning and inventory forecasting projections
- ✓ SAP Business One is a modern business platform which can be easily and quickly customized as per the specific needs of the customers
- ✓ Uneecops' in-depth understanding and experience in providing customized solution for SAP Business One made it the partner of choice for SGS Tekniks
- ✓ Uneecops renders 24 x 7 support via its dedicated portal to handle all your queries and requests.

AFTER: AUTOMATED PROCESSES SPED DELIVERY BY REAL-TIME STOCK MOVEMENTS

- ✓ Increased cohesion between various departments streamlined subcontracting of goods and services
- ✓ Data security concerns were perfectly addressed with branch security add-on for SAP Business One
- ✓ Invoice tracking, profit and loss calculation, and balance sheets maintenance became fast and simple
- ✓ Better reporting, communication and TAT increased customer satisfaction and loyalty

EFFICIENCY GAINS

Increased Production

Boost productivity with controlled inventory and streamlined business operations

Global Platform
